**FUEL CELL POWER GENERATION EQUIPMENT**  
**AND A DEVICE USING THE SAME**

Examiner: Yuan

S.N. 10/080,562

Art Unit: 1745

February 18, 2004

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, drawn to a fuel cell power generation equipment, classified in class 429, subclass 32.
  - II. Claims 11-13, drawn to an apparatus using a fuel cell power generation equipment, classified in class 429, subclass 12.
2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, different inventions have different modes of operation. Invention II discloses an apparatus that requires the use of methanol as the fuel, which is not required in Invention I.
3. If invention I is elected, an election of species is required. This application contains claims directed to the following patentably distinct species of the claimed invention.
  - I-1, Claims 1,3-5,9, drawn to a fuel cell power generation equipment, wherein one or more air vent holes are provided on a wall surface of a fuel container.
  - I-2, Claims 2-5,9, drawn to a fuel cell power generation equipment, wherein a liquid holding material is filled in contact with an inner wall surface of a fuel container.

Art Unit: 1745

I-3, Claim 6-9, drawn to a fuel cell power generation equipment, wherein at least one opposing wall surface of a fuel container has multiple air vent holes having a gas/liquid separation function.

I-4, Claim 10, drawn to a fuel cell power generation equipment, wherein the unit cells are electrically connected in series, parallel, or in combination of series and parallel each other.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims is generic.

4. If invention II is elected, an election of species is required. This application contains claims directed to the following patentably distinct species of the claimed invention.

II-1, Claim 11, drawn to a charger using a fuel cell power generation equipment.

II-2, Claim 12, drawn to a portable power source using a fuel cell power generation equipment.

II-3, Claim 13, drawn to a portable electronic device using a fuel cell power generation equipment.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims is generic.

Art Unit: 1745

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
